

# Fill the Void...

*The AirSpace machine produces interior packaging materials for dunnage and light cushioning applications.*

**AIR SPACE**  
PILLOW PACKAGING SYSTEM

*Using durable coex film, the AirSpace system produces reusable, lightweight air pillows that fill any void or provide light cushioning for any packing need.*

The self-contained unit is a "plug 'n play" (just plug it in and you're ready to go) packaging system weighing less than 50 kg. It plugs into a standard outlet and because of its compact design requires only 500 mm x 1000 mm of floor space. PLC operation provides remote programming capabilities and real-time troubleshooting through a PC modem.

AirPillows are produced efficiently on demand. Adjustable pillow sizes make it easy to produce the correct size pillow for any package — saving valuable storage space, time, and money.

#### Machine Specifications:

Dimensions	48 cm x 91 cm x 30 cm
Weight	41 kg
Power	230V
Speed	50 pillows per minute (any size)
Air supply	Internal

#### AirSpace Pillow Sizes (Film):

Width	Length
200 mm	76 mm–152 mm
250 mm	76 mm–152 mm
295 mm	76 mm–152 mm

#### FEATURES & BENEFITS:

- On demand supply
- Transparent pillows
- Reusable pillows
- Recyclable materials
- Clean & neat
- Lightweight - reduced shipping costs

## Save time, money and space
